First name and Last name
Required for registration

Password
Each user must create his password.
To log in into the platform, you need to enter the email address which you used for registration.

Enter your account password

Via email - send reset link
Roles

IT Platform

IT Platform is designed to serve the needs of many different types of users, who can have different roles and accounts, with features and functions appropriate for each role. Access rights to the information and functionalities of the EIT UM KIC IT Platform are restricted based on the user account.

One account is assigned to one email address.

This means that the address used by the applicant can not be used for example by the evaluator.
User with Applicant role

Applicant role has a wide range of competencies.

Company

Start-ups and Scale-ups will need to create their Company profiles in order to apply for a programme. This preview of the company in the database provides information about company, team, funding history, QA, evaluates and comments from mentors or evaluators.

Application form

Each startup can only apply in one region per program cycle. The default location is based on location in Application form.

Collecting information from users (Companies) via a personalized set of questions - Application Forms.

Collected information includes: company overview, status of application forms, comments, questions and answers, list of the mentors, files and evaluation.

Communicate

Comments are visible only to Company’s disponents, mentors, evaluators, investors and admins. They describe parts of the project where necessary to facilitate the understanding of mentors or evaluators. Users can respond to other comments in the thread. Messages will be visible only to specific groups of users. Users will communicate with startups about their project/ status of the application form/ etc.
Within the profile of an applicant it is necessary to fill in all information - name, surname, bio. Applicant can also upload a photo.

The title section defines the role within the team. For example CEO / COO / CTO, ...

The applicant can decide whether his profile will be visible or invisible.

The applicant can add personal information - phone number, or change his email address here.
Applicant can create new company profile by filling in information such as Name of company, Description, Sector, Location, Business and Product type, Strategic fit etc.

Defining a location is one of the prerequisites for proper association with a co-location-center (CLC).

Based on the location, the company is assigned to the CLC.

According to their location, company will see only programmes they can apply for.

Each startup can only apply in one region per program cycle. The default location is based on defining location in Application form.
Applicant can apply for programme here.

Date until applicant can apply for programme.

EIT UM KIC - Scale Up Preview

Important Information

Application deadline
24 Apr 2020, 12:30

Description
The EIT Urban Mobility innovation programme backs innovative ideas, improves them and puts them into practice as a way of helping resolve the challenges facing eco-efficient and safe urban transport, data exploitation and promote regulatory and behavioural change. EIT Urban Mobility runs ideation and matchmaking workshops and promotes co-creation across the ecosystem in innovation projects, living labs, hackathons and boot camps.

Questions

How will the VAP associated business model solve a problem or use a business opportunity?
- Explain approach and methodology, activities linked to technological/practical and commercial viability, including those related to foresien co-creation or technology adaptation.

As regards co-creation or technology adaptation, briefly describe the foreseen R&D project (post-VAP)
- This Field is COMPULSORY "VAP" or a blank answer will invalidate the proposal. Please answer this question in detail, as the proposal should envisage future R&D cooperation partners in the target country and indicate if you have detected a R&D financing programme for future submission.

What would be your initial plan for commercialization?
- How does the VAP fit into your overall plan to reach market?
Applicant can apply for programme here.

Date until applicant can apply for program.

We are launching a new programme for early-stage startup teams with a mobility-related business idea! Startups selected to the program will receive €15,000 in equity-free funding, will participate in free 6-month acceleration programme with mentoring, coaching and contacts to customers and investors and enjoy free space for 6 months.

Questions

- Have you ever participated in another EIT UM program?
  - If YES, please specify which one
- In what country is your company headquartered?
  - Country
To finish application process, applicant has to click the SUBMIT button.
